LEXAN™ 8A37 FILM

DESCRIPTION

LEXAN™ 8A37 Film is a one side brushed, one side polished transparent polycarbonate film. It offers high temperature resistance, excellent dimensional stability, as well as good printability without pretreatment making it an excellent candidate for multi-layer printing for applications such as overlays, floor graphics, high-performance labels, and in-mould decoration. It can be screen printed using traditional solvent based or water-based inks, as well as UV or infrared drying inks and offers ease of processing for thermoforming, embossing, die-cutting, hydroforming and bending. The brushed 1st surface allows processors and OEMs alike to achieve a brushed metal appearance by back printing, laminating, or spraying with metallic inks, adhesives, or paint.
